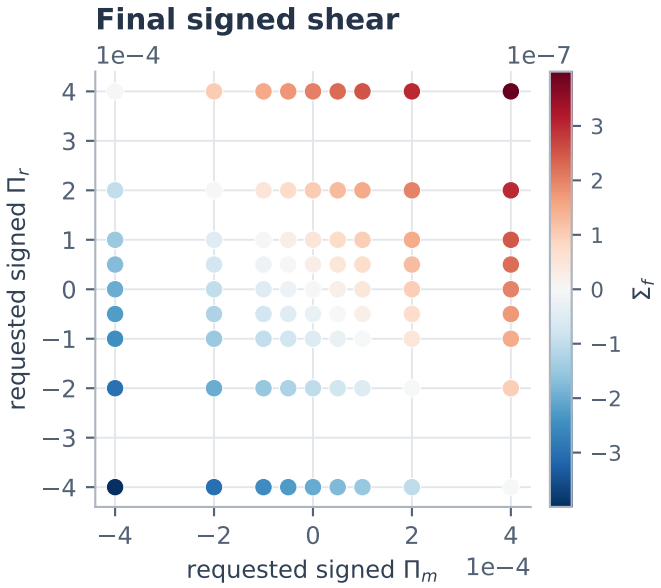
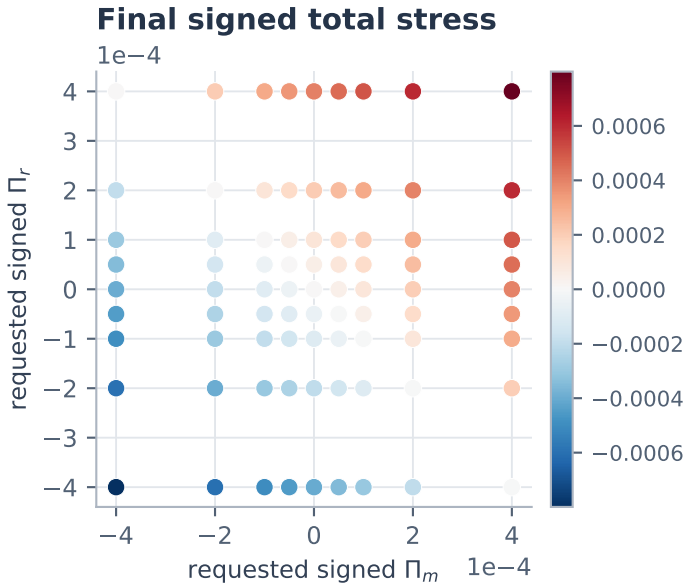
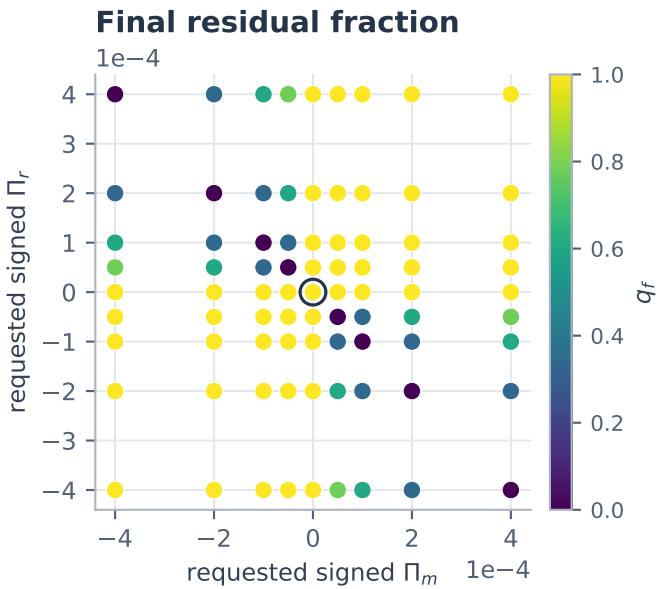
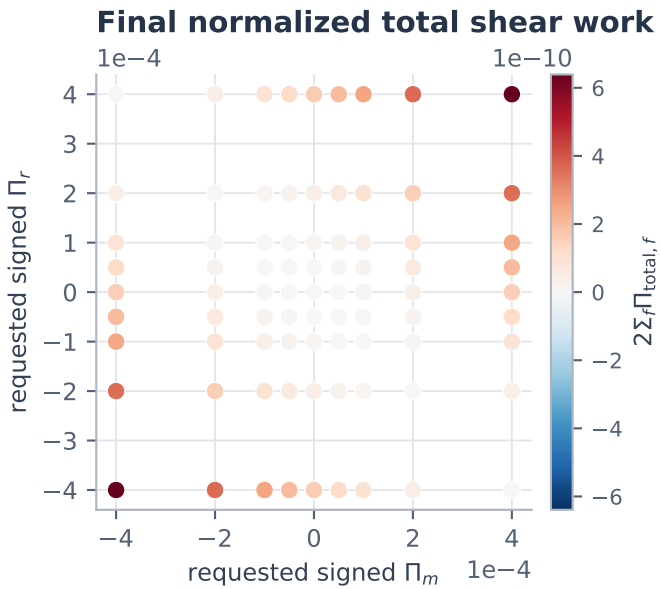
Archived endpoints: exact signed-shear slice

729 cases · 64 steps · archived-owner-c15 · reused_completed
source 9a3a36bf0388 · cohort caed0ccd4a58 ·
endpoints only; intermediate history not loaded in this projection
exact requested signed Sigma = 0; 81 actual coordinates









Ring at requested (0, 0): nominal-zero stress; q reflects raw floating-point residuals, with no physical cancellation interpretation.

Half-contraction convention. Each marker is one stored endpoint. Colors show saved values; no interpolation, absent-cell fill, or history reconstruction.
