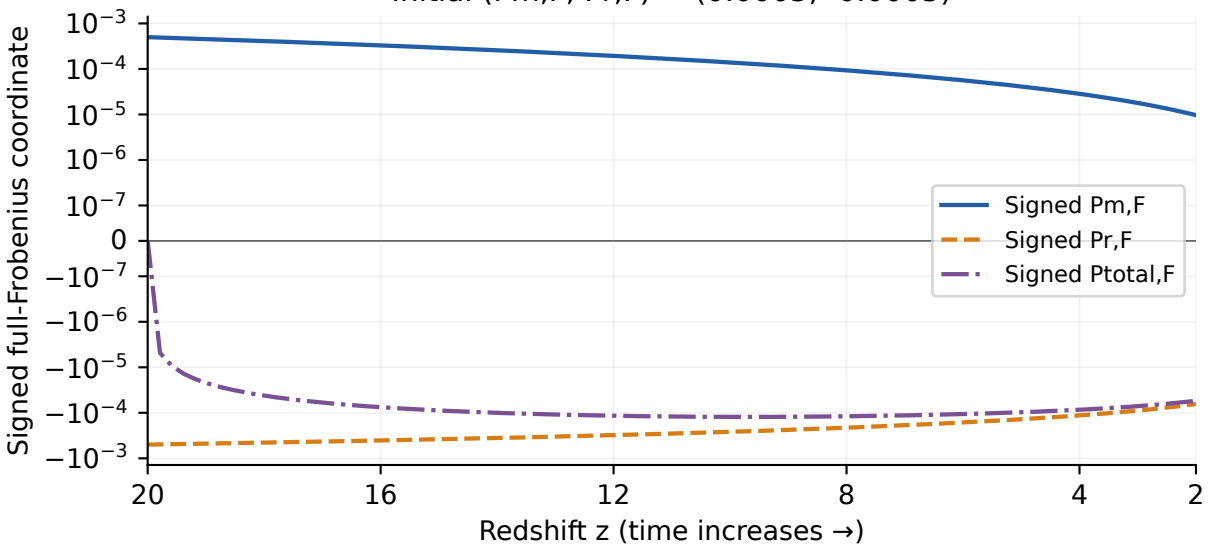
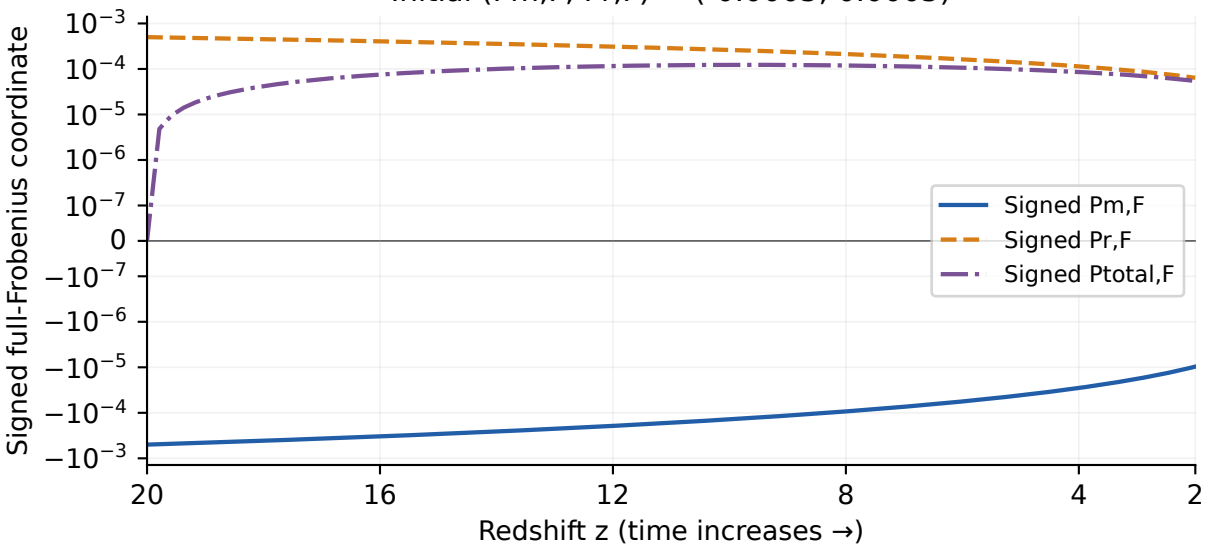
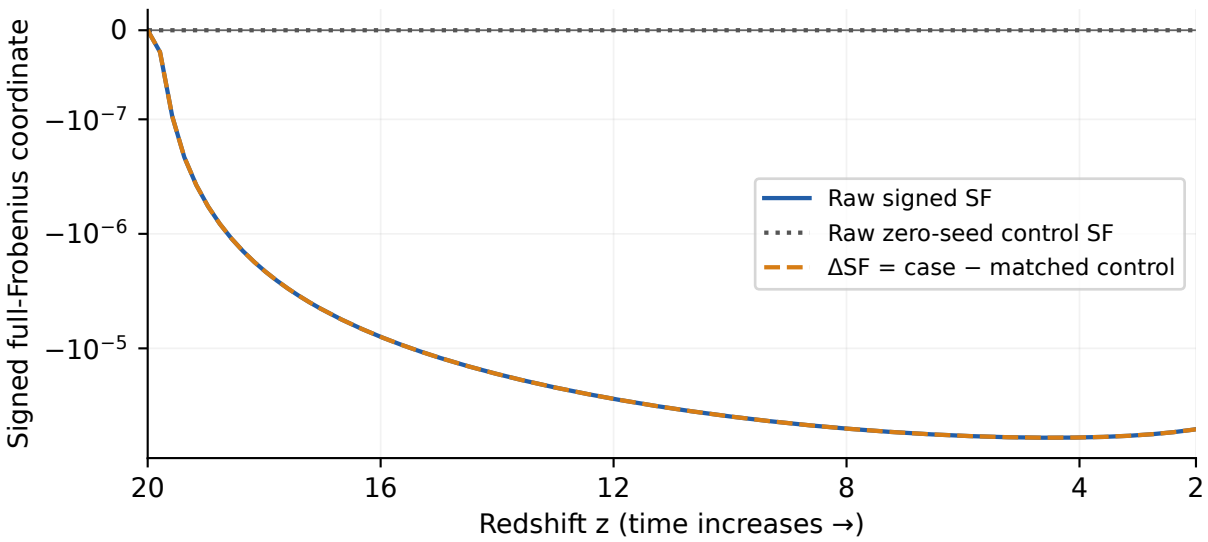
Initially cancelling stress components: actual evolution and matched zero-stress control

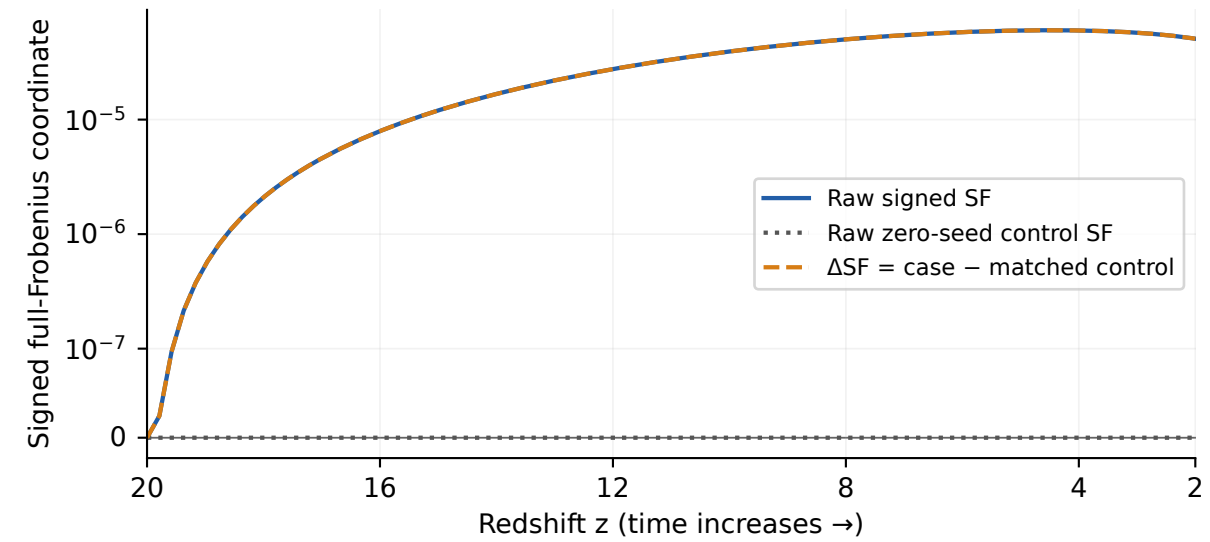
cancel_positive_matter
Initial (Pm,F, Pr,F) = (0.0005, -0.0005)

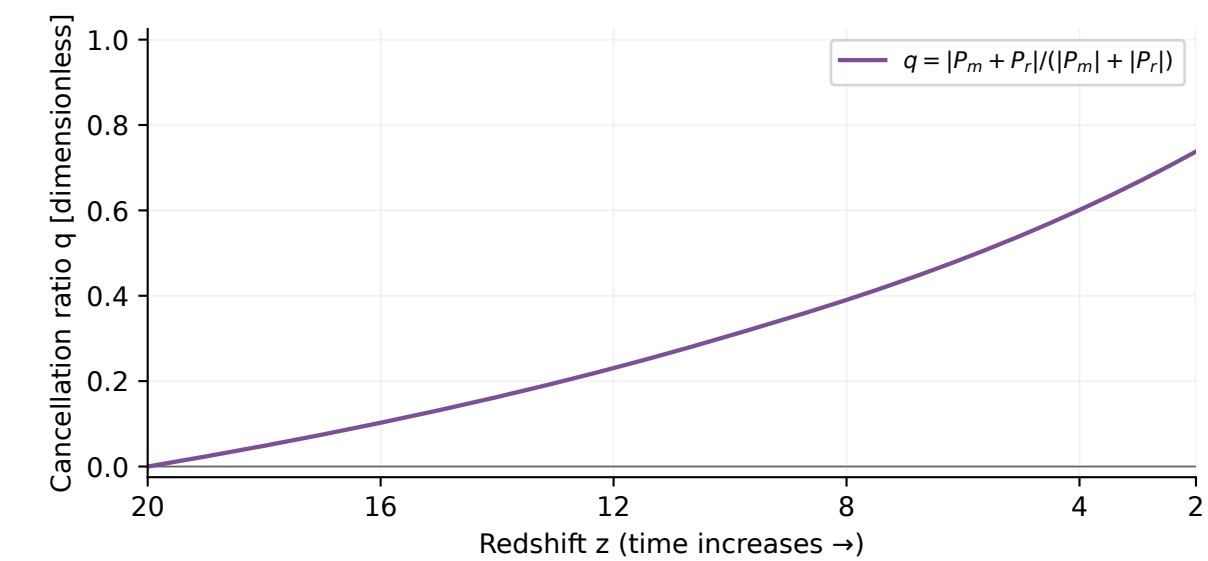


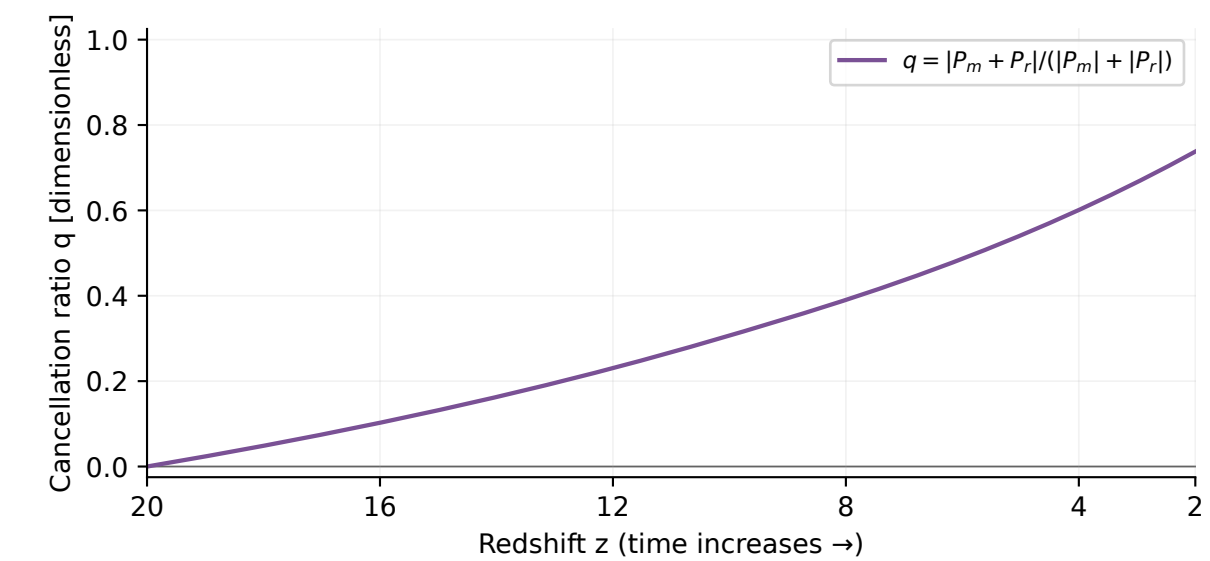
cancel_negative_matter
Initial (Pm,F, Pr,F) = (-0.0005, 0.0005)











Retained LRS H–Li model; prescribed T(z) and external isotropic UV; test-fluid baryons.
Signed values, not norms. Zero-seed control roundoff is retained. q is undefined where its denominator is zero; no replacement.
