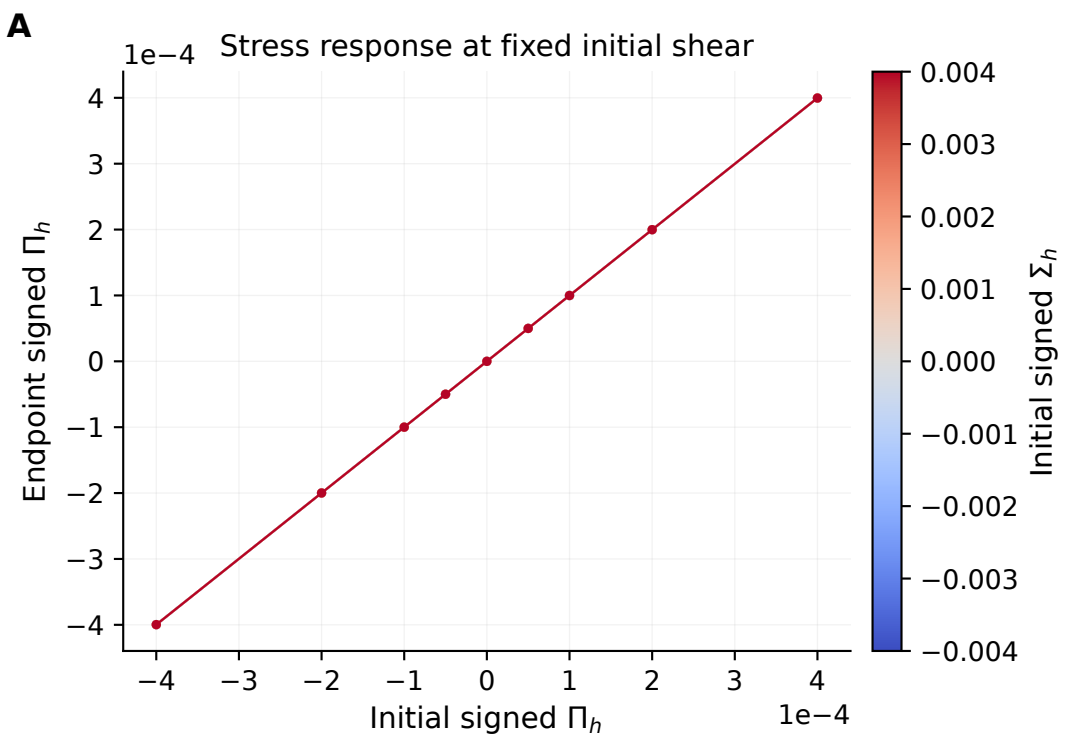
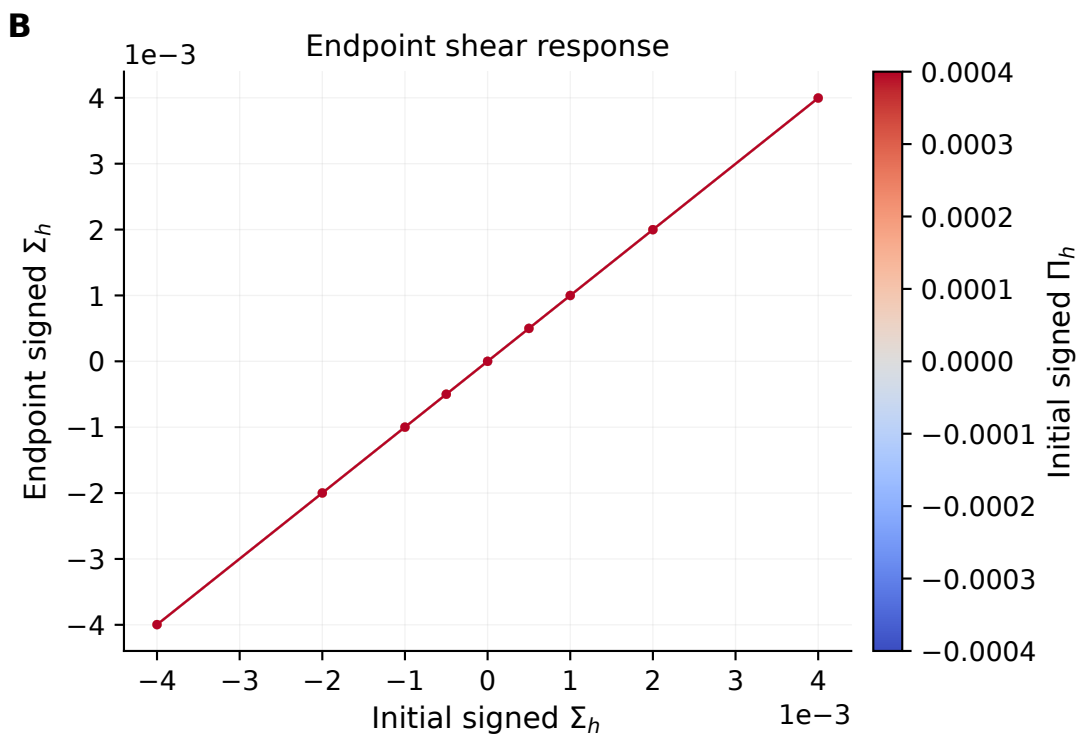
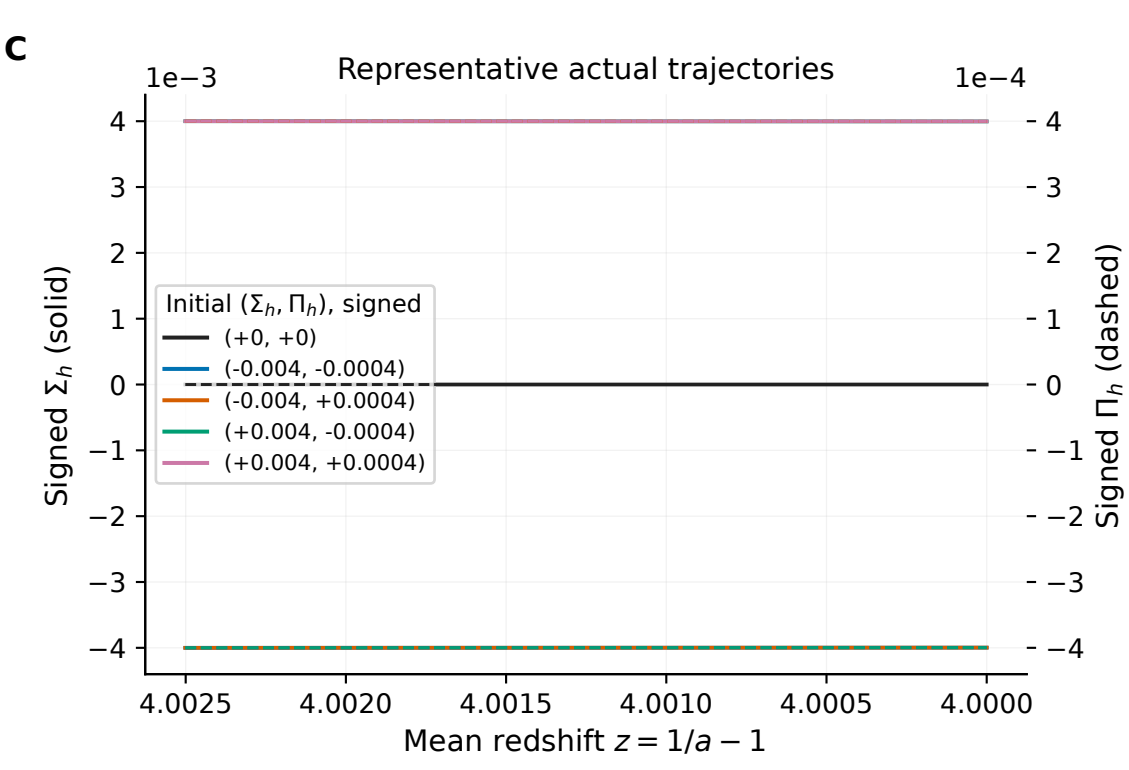
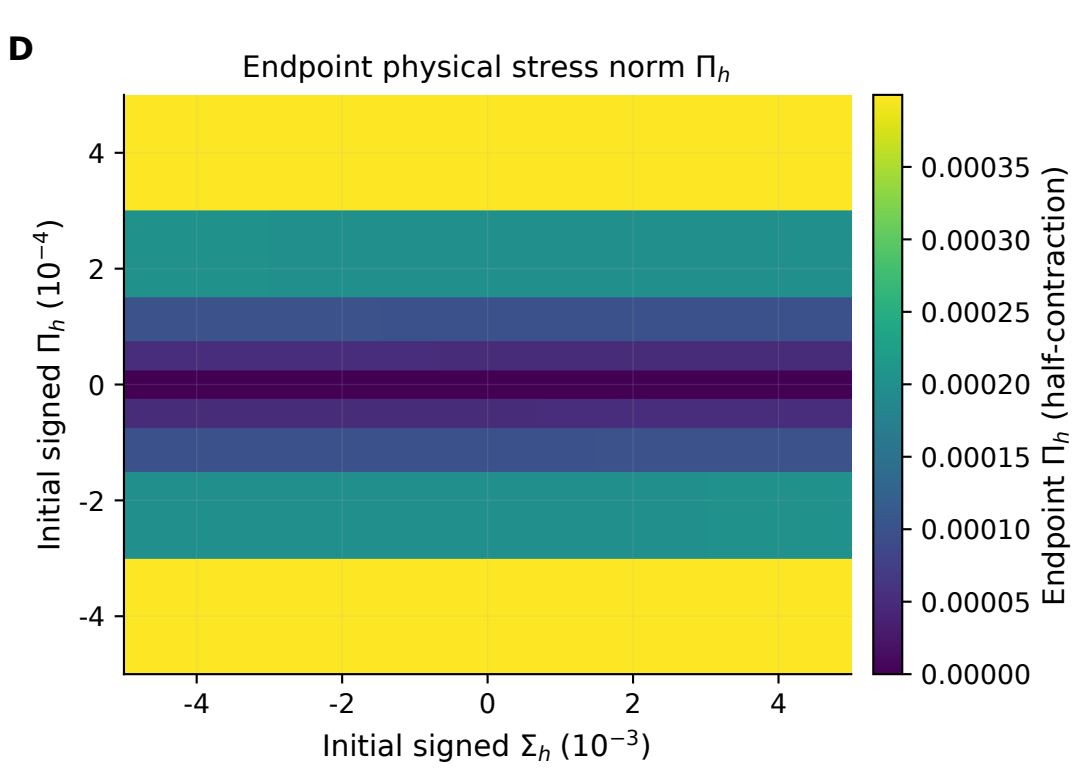
Conditional Einstein–Boltzmann signed shear–stress pilot
Half-contraction norms; warm $a = 0.1999 \to 0.2$, $z = 4.00250125 \to 4$









81/81 actual cases; 64 steps; L=8; native 8×8; common positive P_2 seed; all physical stress terms on.
Initial gas: 12,000 K, xHII=0.4, xHeII=0.5; massive fraction=0.1, m/T=30; compression and predictor–corrector on.
External MD14 stellar source and Case-A escape: full donor/escape Q^a closure, full EoR history and convergence remain open.
Owner REI 80825585f9fe31d2ee0d5af545ada3fa1f52be72; preliminary conditional response. Thermochemical differences are not convergence claims.
