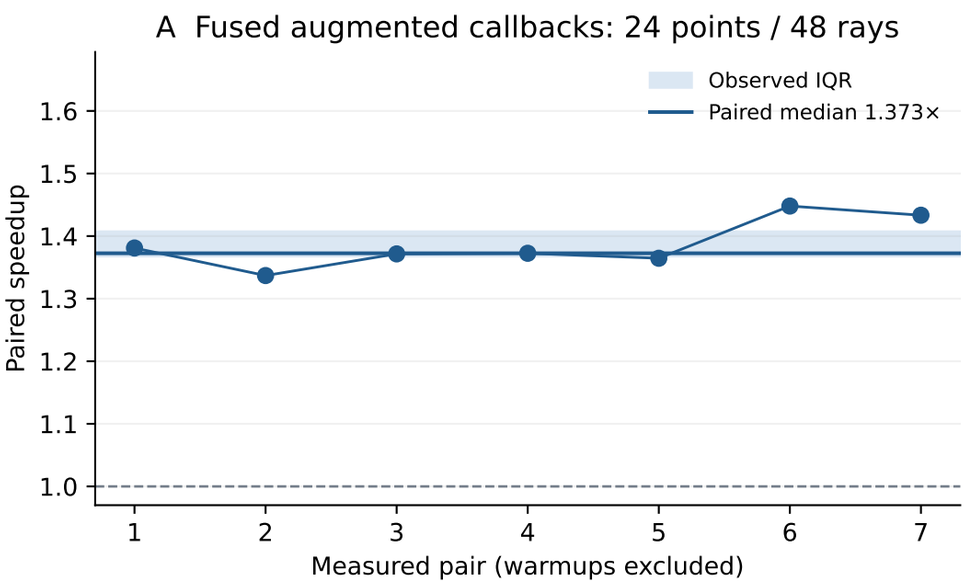
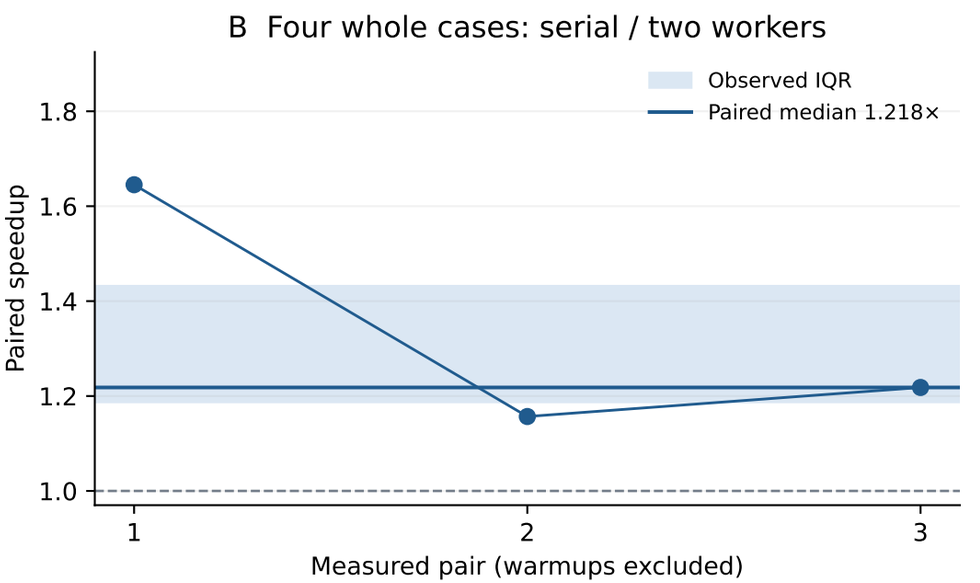
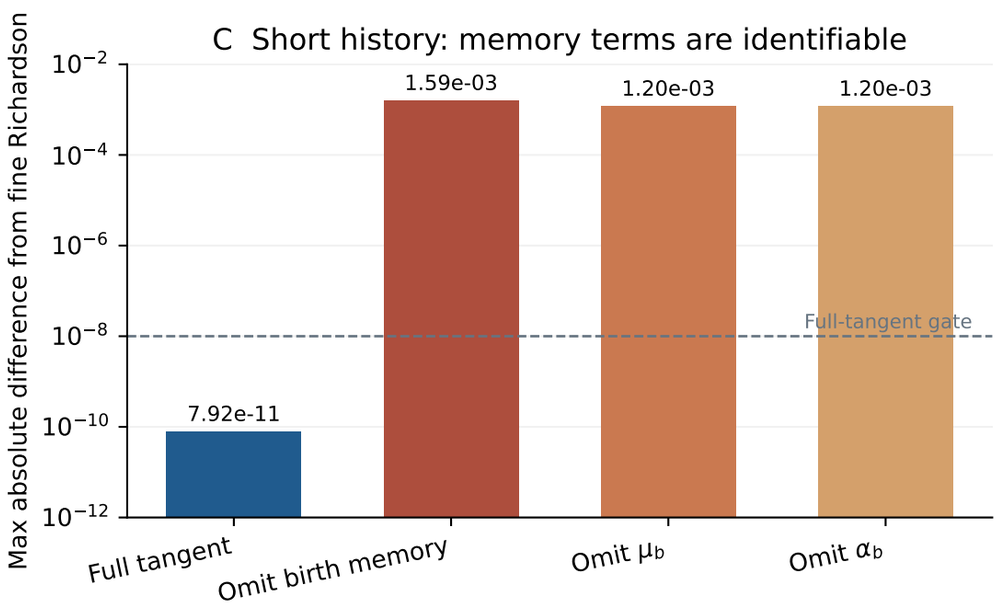
BASS S12 | birth memory and fixed-workload optimization

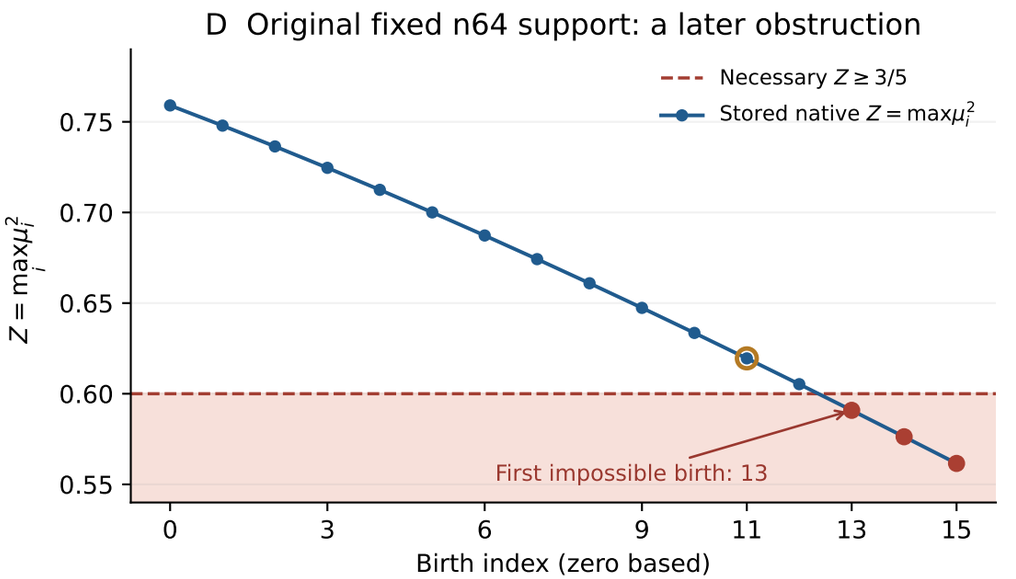
Rust f4cd0d53 / verifier 4e3615dd / stored-support observer be773dbf

Sandbox measurements and reused native evidence. NCP64 execution: NOT RUN.









A: 7 paired samples, 2 warmups. B: 3 paired samples, 1 warmup; process/file costs included.

IQR is not a confidence interval. C: omission controls retain failed physics gates. D: exact gate = $3/10^{15}$; no native replay.

No continuum, native full spectral-history, actual MD14/shared-Q, or full-EoR completion is inferred.
